Empus Loniuctionis vel Oppositióis Tleru luminariu: boc est Solis e Lune ad quodeug tempus eniuseug meridiani invenire. C'Ande ad boc inveniendum neces, saria sunt oppositione: su volueris veram co invenire media coniuctione: si volueris veram co inuctionem, vel mediam oppositionem: si volueri babere veram oppositione. Secundu est inventio locop Solis e Lune tempose coniuctionis vel oppositionis proposite.

Tertium est inventio duodecime partis longitudinis Solis z Lune. Quar tu est inventio motus Solis z Lune in vno minuto diei; vel in vna hoza. Iccirco earum bic primo ponemus propositiones.

cum quartize. in tabula medie elongationis Solis z Lune prius, z veinde intra cum quartize, in tabula medie elongationis Solis z Lune virecte eodé modo per omnia operando: ficut victum est in ve medijs motibus. Et cum omnes introitus feceris: z numeros addideris: in eodem tempoze est media coniunctio ad quod operatus est pueniant signa. 6. prescise. Et si tria: in eodem tempoze est media oppositio. Si so non proueniut signa. 6. nec tria prescise: tunc si volue ris inuenire coniuctione: subtrabe illud quod prouenerit ve signis. 6. z serua restidui. Si volueris oppositionem: subtrabe illud quod prouenerit ve signis. 3. z serua restidui. Quo facto quere illud residui in tabula medie elongationis. z si fuerint ibi aliqua signa: quere ea in prima linea post lineam numeri. z si prescise totum numeru signozu z graduu ze. non inueneris: accipe minore propinquio, rem. z vide numeru scriptu in virecto in linea numeru. quem scribe extra. z sunt vies. serua eos ad partem. Deinde subtrabe illud qo accepisti in tabula. sisgna et gradus ze. a numero tuo quem babebas. sa signis z gradibus ze. vt scias resi duu. Lum quo intra tabulam eandem. Et si sint gradus in residuo: quere eos in prima linea post lineam numeri. z si eos inucneris: illud quod scriptum est in li, nea numeri erunt minuta vierum, scribe eos extra post vies prius servatos. Si auté suerint tot gradus: y non poterint in prima linea inueniri: tunc quere eos

£ 3

m fecunda linea in illa parte voi eft cifra vl.o.in prima linea: vel minere numer rum propinquiozem.et tunc illud quod scriptum eft in linea numeri funt vies. scribe eos extra sub alijs prius scriptis. Couo facto vide fi aliquid fit residus subtrabendo illud cum quo intrasti a numero tuo, et illud iterum quere in ear dem linea. Et fi in refiduo fuerint gradus et inueneris in prima linea. tuc illud quod scriptum est in linea numeri funt 2 vierum. Si ante fint tot minuta q in prima linea non poterut inueniri tunc quere ea in fecunda linea: in illa parte in qua est cifra vel.o.in prima linea. et tuc quod scriptum est in linea numeri sunt minuta vierum. Et iffas venominationes oftendunt tituli subscripti in pede ta bule. Et isto modo opoztet te intrare vonec totus numerus compleatur. Et eft fimilis mod' operandi fere ficut in tabula voi querunt anni per 4 3 221 : Et scias q vies fic inuenti funt vies complete computate'a meridie viei preceden, tis. Similiter et minuta vierum zc.funt completa: ficut anni menfes z figna. et omnia que inueniuntur in istis tabulis sunt completa. Quo facto dies et mi nuta vierum et ceteras fractiones:quas inuenisti per operationem: adde tem posi cum quo quesiuisti mediam elongationem et quod post additionem prouenit:erit tempus comunctionis vel oppositionis medie. (Si po babita con, iunctione volueris modo faciliozi inuenire oppositionem sequentem. vel babi ta oppositione volueris confunctione sequentem (equale enum est tempus vtro, big)adde supra tempus quoduis istorum vies. 14. munuta vierum. 45. 2 455. 3 .3. 4.48. Di etiam quadraturas volueris inuenire. Adde supra tepus con iunctionis dies.7.minuta vierum. 22. 2.57. 3.31. 4.54.7 babebis quadratu ram primam. Adde illud idem fupra tempus oppositionis: 2 babebis quadratu ram fecundam. Clel fi babita confunctione volueris inuenire confunctionez immediate sequentem: Eldde supra tempus inuentum confunctionis Dies. 19. minuta dierum.31. 2.50. 3.7. 4.36. Tantum enim est ab vna coniuctione ad aliam Et ita babebis tempus coniunctionis vel oppositionis medium ad meri, dianum Toleti. (Si auté te in alio loco existente ad meridianu tuum velis reducere illud tempus: quia fozfan alibi babitas. Lognofce tepus vistantie me, ridiani loci tui a meridiano Toleti. Et fi meridianus loci tui fuerit ozientalioz meridiano nostro: illud addas ad tempus confunctionis z oppositionis zc.per nostras tabulas umentu. Si po occidentalio: ipsum subtrabes z babebis ipsas conifictiones z oppositiones ad meridiani tue regionis.

Erum locum Solis 7 Lune boza medie coniunctionis cuiuscungs et oppositionis inuenire. Scias argumentum Solis per. 15. et cum eo intra tabulam equationis Solis: 2 operare scom voctri nam. 16. cognitam. 2 babebis verum locum Solis. Clerum auté locum Lune babebis querendo argumentum Lune in tabula

equation Lune. z in virecto invenies equationem argumenti cum fuis titulis adde vel minne: fi cum argumento non fint minuta. Si Fo cum argumento fint minuta: fac pro illis partem proportionalem: pt victum est in. 11 . banc equatio.

nem adde vel subtrabe scòm q tituli admonent: a medio motu.et prouent verus motus Lane. (In tempore en confunctions vel oppositions, p faciéda e quatione lune no ingredim cu eius centro: quia equatio centri nulla est. The ce, tiam accipinus oiner statem viametri circuli breuis: quia minuta proportiona lia nulla sunt: sed tim cu equatione argument opamur. Et babebimo propositum.

Todecimă partem distătie inter Solem z Lună inuenire; vt fieri opoztet în equando coniuctiones z oppositiones Solis z Lune ve ras. De u gradib distantie eo p intra tabellă distătie primă z c. et g. z. m. ibi inueta extra nota. Deinde cu minutis distantie intra in tabellă secundă distătie z c. z q dibi inueneris ex minuțis z secudis

fub pmis feribe. O fi in distantia fuerint 2 intra tertio eande tabulă minutop. 2 qd ibi iueneris: lub pmis inuetis pone, ita tă o minuta lub secudis ponanf. Od po cu eo paggregatioe puenerit: erit duodecima ps distatie inter Sole Lună.

Otum Solis & Lune vinerfum in vno vie: vel in vno minuto viei vel in vna hoza inuenire. Thuéto vero loco Solis 2 Lune: vt supra boza medie piúctionis vel oppositionis p pcedenteia superio vide differentia id est logitudine inter verum locum vtriusq: ita s. subtrabendo minozé a maiozí z quod remanet est longitudo. Et vide cuius sit logitudo. est eni longitudo cius qui precesserit alterum in ordine fignopeid est tunc talis longitudo est Solisch Luna nondú confecuta est Solem in confuctione: vel nadir Solis in oppositioe. Tel est Lune: fi Luna iam trăsuit Solem in piùctione: vel nadir Solis in oppositione. IDac ergo logitudine serva. et scribe ingta Logitudo Solis vel Lune: scom q oportet. Qui logitudinis ac cipe ouodecimă parte: z ipsam eide logitudini adde. z illius totio partiedo ipm in duo media accipe medietate: z ea cu argumeto medio Lune cu quo inuenisti eins veru locu adiuge:fi fuerit logitudo Solis.
